

Bus Training

A Learning Experience

ROCKFORD MASS
TRANSIT DISTRICT

RAMP
no limits

We assist people with disabilities in learning how to use public transportation. RAMP believes that this is an important skill for individuals with disabilities to learn so that they can be productive members of their community and get the services that they need in their community. (The services provided in Rockford and Belvidere is a cooperative effort with the Rockford Mass Transit District.)

Online Referrals

Completing the online referral is the next step toward increasing independence for you or someone you know. Simply answer each question and submit the form. If this referral is not for yourself, please make sure that the individual you are referring knows that we will be calling and why.
